Energy Price Cap Expected to Rise Again in October

[According to Ofgem, the energy price cap is expected to rise in October to around £2,800.](#)

The Resolution Foundation said that the increase could mean 9.6 million households in England are in "fuel stress" this winter.

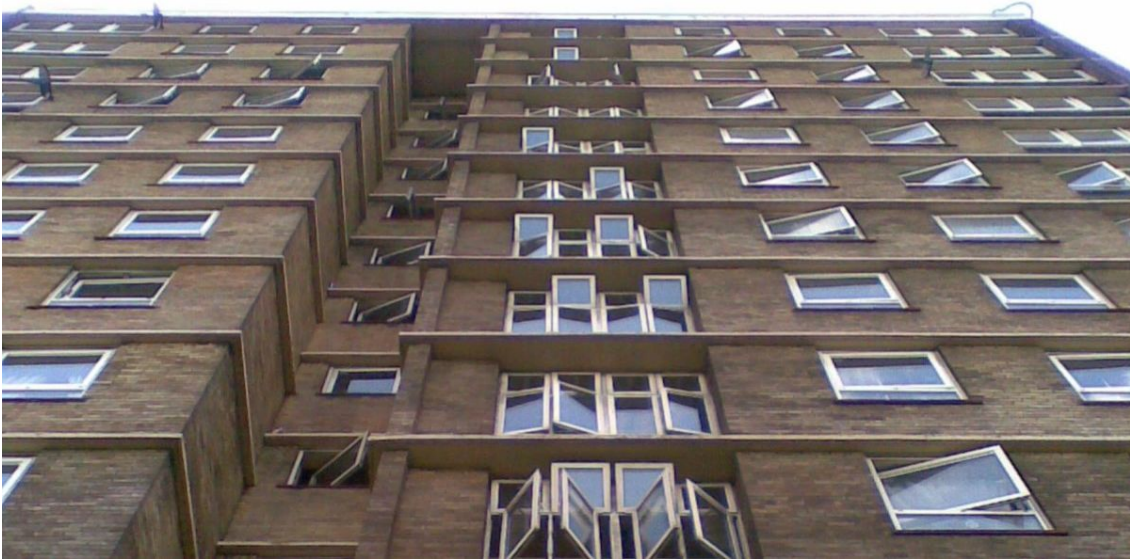

Coupled with the Cost of Living Crisis, the announcement of a £15billion package of targeted government support is welcome news for those already struggling to pay their bills.

invasion of Ukraine and the highly volatile global gas market. To address this issue, the Government also announced an [Energy Profits Levy](#).

Partial ban for combustible materials on new medium-rise buildings to be imposed

[A recent article](#) from Inside Housing has revealed that the use of combustible external wall materials on medium-rise buildings will be subject to tighter restrictions and the type of cladding material used on Grenfell Tower will be banned for use at any height, under new rules unveiled by the government on 1st June.

This proposal means that nearly all combustible materials such as plastic, timber cladding and high-pressure laminates are banned for cladding buildings that over 11m in height.

Changes to building regulations and guidance are not retrospective, meaning
